Pathogens can become attached to surfaces and grow to form small colonies known as a Biofilm. This Biofilm can grow and become difficult for disinfectants to successfully remove and destroy. Sani-Cloth HyPerOxide effectively detaches Biofilm from a surface and destroys the harmful organisms. The Hydrogen Peroxide based formulation is boosted by the surfactant which improves cleaning and efficacy. Sani-Cloth HyPerOxide has a full spectrum of efficacy against spores, bacteria, yeast, viruses and Biofilm.

Recyclable packaging.
